

Community Learning as Problem Solving

Tamas KOZMA

MellearN Conference, Corvinus University, Budapest, 21-22 April, 2016

The presentation is based on the findings of the LeaRn Project , supported by the Hungarian Fund for Scientific Research (OTKA, K-101867).

Community Learning as Problem Solving

- ‘Learning’ concepts
- Field studies
 - Similarities
 - Differences
 - outcomes
- A new model

1 Learning Concepts

Learning: individual? >< collective?

Social learning (Bandura 1977)

Community learning (Wenger 2005)

Learning as problem solving

Tisza Corner. Hungary

Drawing by L Szabo,
1967

2 Field Studies I: Similarities

- Small towns in the 'Tisza Corner'
- Mostly agricultural w/ slight industrialisation
- Administrative functions
- Deportations
- Secondary schools after WW2

2 Field Studies II: Contradictions

- Identity revival and narratives
 - K: Catholic, *central adm functions*, 'shared identities', mixed narratives,
 - T: protestant, The Granary, industrialisation in the periphery
- School
 - K: Established by the state (1953)
 - T: Initiated bottom up (1945-48)
- Coordination
 - K: competition instead of coalition

3 Field Studies III: Outcomes

- Filling stations (as a metaphor)
- Demography
 - K: loss ($14000 > 8400$)
 - T: gains ($10000 > 11080$)
- Schools
 - K: loosing (grammar school programme)
 - T: blooming (new special programme:
military education)

4 A New Model

- The community is **challenged**.
- The leading figures of the community **formulate the problem** caused by the new challenge. A **competition starts**.
- The community **meets the challenge**.
- The new knowledge, information and competencies, necessary for solving the problem, **will be integrated** into the traditions of the community.
- The community--with experiences of successful problem solvings, of gathering up-to-date information, knowledge and competencies, and under the leadership of those who successfully met the challenge--**transforms from its former conditions into its future self**.

Learning Communities in the Making

- 1 How Do Communities Learn?
- 2 Tisza Corner: A periphery in the heart of the country
- 3 Community 1 (Kunszentmárton)
- 4 Community 2 (Tiszaföldvár)
- 5 Lessons

1 How Do Communities Learn?

The result of our former LeaRn studies:

- A social challenge – 1989/90
- Meeting the challenge - transformation
- Quest of information and (new) knowledge
 - Traditional and emerging social groups
- The function of narratives

2 The Tisza Corner

The Characteristics of the Tisza-Corner

- Mysterious deaths > murder (1930)
- Closed territory (economic, social, cultural)
- A „border region” (historical minorities)
- Unable to transform after 1989/90

3 Community 1

Community 1 (Kunszentmarton)

1 Economy

- Agricultural industry (late 19th c)
- 1989/90: nationalised industry (developed after 1949)
- Privatisation > loss of market

2 Demography

14 000 > 8 000

Community 1

3 Education

1953 -: grammar school + VET

1992 -: institutional merging > VET
education

2014 -: loss of the grammar school prgm

Elites: Fighting to meet the challenge

Group A: The local history collection

Group B: The local parish

4 Community 2

Community 2 (Tiszaföldvár)

- Demography
 - 12 000 > 13 000
- Economy
 - 19th c -: one large estate, agr modernisation
 - 1922 - : shoe industry (nearby)
 - 1949 -: agr cooperative (state support+small industry)
 - 1989/90: no major privatisation

Community 2

- Education: Secondary school in the centre
 - 1948 -: Grammar school (grassroot)
 - VET education: initiated by and integrated to
 - Local geography and history collection: independent > cooperation
- Elites:
 - Horizontal cooperation
 - Secondary school as coordinator
 - History (narratives) as means for community building

A Comparison

- The Challenge: 1989/90
 - Com 1: Industry privatisation: a loss
 - Com 2: agriculture: relatively stabilised
- Quest of New Answers
 - Rivalry, if education is not in the ctr (Com 1)
 - Cooperation, horizontal, w/ school in the ctr (Com 2)
- The Functions of Narratives
 - Local history legitimating the present (Com 1)
 - Local history as means of community development (Com 2)

5 Lessons

How Do Communities Really Learn?

Historical challenge: 1989/90

Serious competition for the new knowledge
(more than it would be thought earlier)

Ed institutions (local collections!) have the
key roles

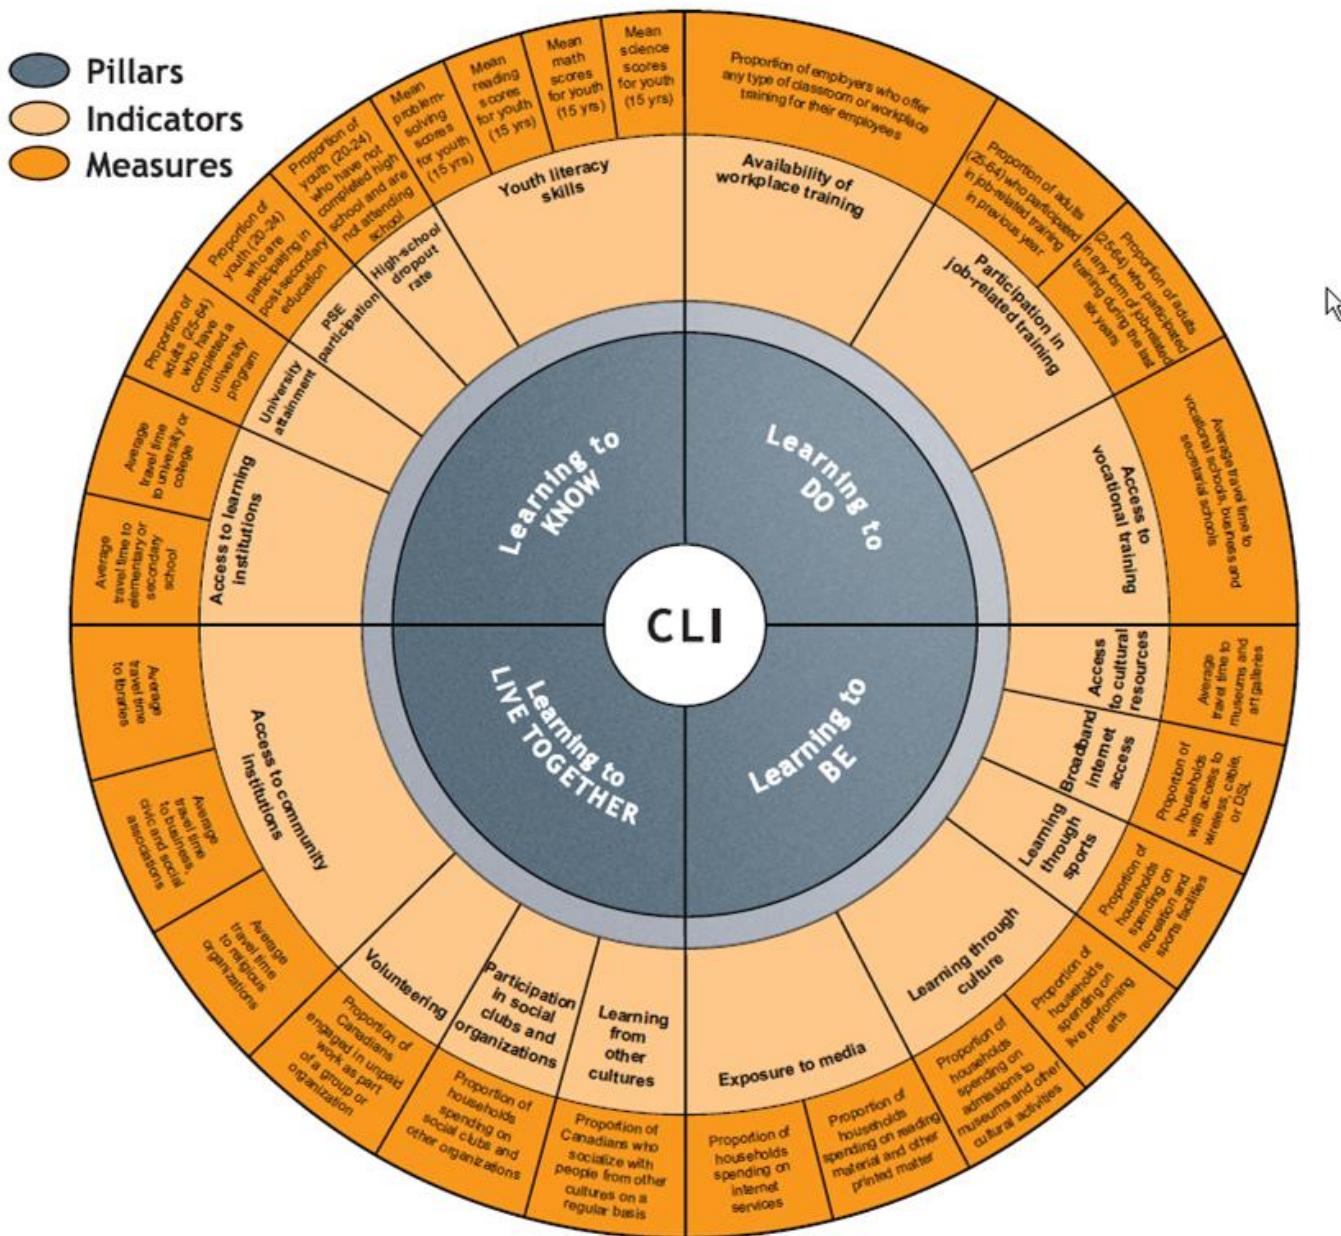

Local histories have various functions

The Components of the 2010 CLI (www.cli-ica.ca)

A központok időbeli elérhetőségének különbségei

[%]

(Forrás: TEIR, GEOX, 2011)

Tiszazug jellemzése

- Fekvés (Kiskunság – Nagykunság közt)
- Történet (arzénes gyilkosság)
- Sorvadó falvak – kiemelkedő kisvárosok

Case Y (Tiszaföldvár)

- Népesség: K-hoz képest növekszik
- Gazdaság: Podmaniczky > Martfű
- Intézmények
 - Középiskola: virágzik, vezető szerep
 - Természetföldrajzi múzeum: kooperál
- Múlt: földolgozása
- Elit: kooperál
- Eredmény: vezető szerepre tör

Comparisons

- Múltat földolgozni (T-ben megy, K-ban nem)
- Két iskola verseng, melyik adja föl?
- Egyikben összefogott a R&E, a másikban szétesik
- K-ban egymással harcol az elit; T-ben kooperál
- K-ban vissza akarják állítani, T-ben új utakat keresnek.
- Személyek fontossága

Community 1 (Kunszentmarton)

- Kb 10 000 lakos, csökkenő népesség
- Múlt: virágzó, majd 1945-től törés stb
- Rendszerváltozás „betesz”
- Helyi elit küzdelme (polgármester)
 - Középiskola, hal meg
 - Helytörténeti múzeum, virágzik
 - Plébánia, átveszi az „irányítást”
- Eredmény: elveszti központi jellegét
