# THE RELATIONSHIP BETWEEN COVID-19 AND TURKEY

Covid-19 this date as the official Turkey was adopted as the national viruses. schools, universities, and workplaces started to switch to the online system. case and death rates were increased day by day.

Cases began to rise and eventually began to experience turkey in the 2nd wave. Many businesses work online, schools, universities have switched to the hybrid system. the death rate is increasing every day.

April 2020

August 2020

October 2020

The virus has begun to be taken under control. Many students graduated from the online system for the first time, workplaces began to reopen (some workplaces were continuing to work online) rules involving covid-19 began to be relaxed.

## GENERAL STATUS IN TURKEY;

- Despite all precautions, as the first Covid-19 came to Turkey in March.
- Turkey had made all the preparations for Covid-19, but the case did not prevent in any way, measures were taken in a large amount of influence the spread of the virus.
- First time in history in the field of business and education system in the Republic of Turkey was now online system. In this way, Turkey it is one step closer to digitalization.
- Computer sales increased by 40 percent last April, companies started to make remarkable discounts on internet quotas.

## WORKING CONDITION IN TURKEY;

- Since March, almost all workplaces have been closed, companies that are open have been subjected to heavy fines.
- Serious restrictions were placed on job descriptions and working hours. Information was given that employees may face dismissal if they leave their home.
- Labor unions started working to protect work and worker rights after the unpredictable virus situation.
- Some workplaces that have agreed with the state have switched to a hybrid system at work. In return, they paid a lot of Money to state and the state started to controlled 3-4 a week.

## COVID-19 AND THE RESULTS OF THE NEW SYSTEM IN TURKEY;

- Working efficiency in companies started to increase. In the first month of the virus, productivity increased significantly compared to the previous month.
- Employees of the company started to spend more time on their own lives (family, hobby, traveling, etc.) and this affected them in a positive way psychologically.
- It seems that some company employees were fired because they were not good with technology, and nowadays the incident of layoffs has increased considerably.
- From this process to go on a flexible cap in Turkey began to increase. Employers are now encouraging most of their employees to proactive thinking and creative thinking because they are more comfortable
