

Opportunities and Challenges in the Digital Transformation of Higher Education in Finland

Prof. Pekka Neittaanmäki
University of Jyväskylä, Finland

Professor Pekka Neittaanmäki

Born in 1951, has had a distinguished career at the University of Jyväskylä, serving as a Professor of Scientific Computing from 1988 to 2022.

During this period, he also held the UNESCO Chair on Digital Platforms in Education and Healthcare from 2018 to 2022.

In recognition of his extensive expertise and contributions, since 2022, he has been appointed as a Senior Advisor at Lappeenranta University of Technology.

Over the course of his career, he has supervised an impressive number of 130 PhD students, showcasing his commitment to mentoring the next generation of scholars in his field.

for Transforming Economies,
University of Jyväskylä, Finland

Introduction

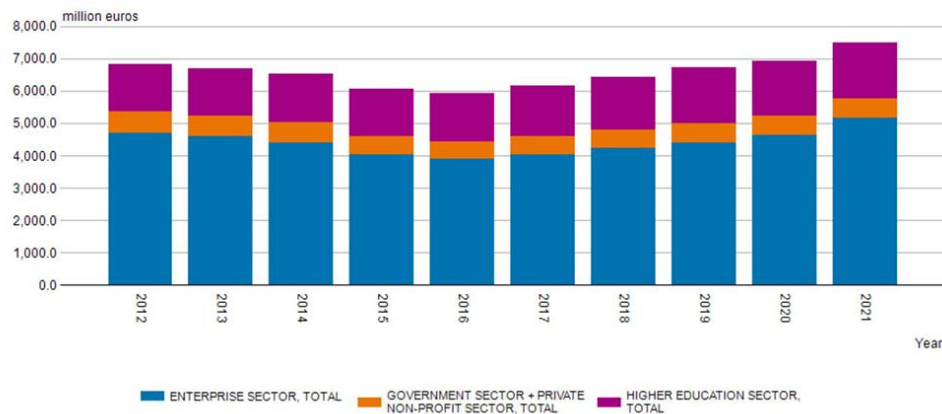

- **Technology and Education Intersection:** The dynamic interaction between technology and education.
- **Finland's Leadership:** Examining Finland's role in digital education, particularly through the University of Jyväskylä's initiatives.
- **Opportunities and Challenges:** Pivotal opportunities and challenges in the future of higher education.

Finland's Investment in R&D

R&D expenditure (EUR million) by Performing sector and Year. R&D expenditure (Mill. EUR).

- Finland aims to increase its research and development expenditure to four per cent of GDP by 2030. For context, in 2021 the overall GDP share of R&D expenditure in Finland was 3.0 per cent (7.5 billion euros).
- Investment has fueled innovation across various sectors and industries, driving economic growth and creating new opportunities for Finnish businesses.

Finland's Leadership in Digitalization

- Finnish companies have become world leaders in digital technologies through the government's program.
- Cutting-edge innovations in areas such as artificial intelligence, 5G networks, and IoT have propelled Finland to the forefront of the digital revolution.
- Favorable environment for tech companies to thrive, attracting global investments and partnerships.

Finland's Sustainable Energy Solutions

Leadership in environmentally friendly energy production, with a strong focus on sustainability:

- textile fibers from wood cellulose
- circulation
- hydrogen technology

Innovative solutions for clean energy production, such as advanced biofuels, wind power, and energy-efficient technologies.

Positioned Finland as a pioneer in sustainable energy solutions, attracting international recognition and partnerships.

Development and Renewal of Finland's Regions

- Economic boost through the government's program, with new industries and businesses flourishing and unemployment rates declining.
- Development and transformation of previously underdeveloped regions, creating a more balanced and thriving economy across the country.

Digital Learning Platforms and Online Resources

- More prevalent in Finland, providing access to learning materials anytime and anywhere.
- Encourage self-directed learning.

Collaboration between Educational Institutions, Employers, and Workers

- Important to ensure that learning opportunities are aligned with industry needs.
- Employers and educational institutions work together to provide relevant training and support for workers.

Background of Digital Transformation

- **Definition of Digital Transformation:** Integrating digital technology into all areas, fundamentally changing how organizations operate and deliver value.
- **Impact in Higher Education:** Rethinking curriculum design, delivery, and engagement with students and the community.
- **Significance for Finland:** Finland is renowned for innovative approaches to education, with institutions like the University of Jyväskylä leading in digital adoption.

The University of Jyväskylä's Success Story in Digital Transformation

- **Faculty of Information**

Technology: Known for cutting-edge research and development in digital learning tools.

- **Agora Center:** Focused on human technology and social sciences, promoting user-friendly technological innovations.

- **Multidisciplinary Research and Education:** Blends IT with healthcare, education, and social sciences, illustrating a commitment to solving real-world problems with improved outcomes.

UNIVERSITY OF JYVÄSKYLÄ
Faculty of Mathematics and Natural Sciences

INTERNATIONAL SUMMER SEMESTER
in Physics, Mathematics and Chemistry
August 1-31, 1991 • Jyväskylä, Finland

Would you like to spend a month in Finland?
Are you finishing your undergraduate studies
or are you beginning your graduate studies?

The Faculty of Mathematics and Natural Sciences of the University of Jyväskylä organizes an International Summer Semester in August 1991. The semester offers you eleven courses in Physics, Mathematics and Chemistry. Enrolled you will find the detailed course program and the registration form. You may choose any course according to your personal interest. It is recommended that you take at least two courses. Credit will be given in each course to those who pass the examinations successfully.

There is no participation fee for the school. The participating student will be accommodated free of charge in modern student apartments consisting of a bedroom and shared kitchen and bathroom. The University of Jyväskylä will also grant a scholarship of 200 FIM (approximately 230 US\$) for each foreign student. The students have to pay their travel costs and living expenses.

The University of Jyväskylä is located in Central Finland, which is known for its beautiful lakes, ridges, bays and forests. The scenery of Central Finland is based on modern pulp and paper industry. The city of Jyväskylä, having 85,000 inhabitants, has been the site of the World Cup Rally, the Rally of the Thousand Lakes, every August since 1980. Jyväskylä and its surroundings offer numerous free-time activities including tennis, golf, track and field, hiking, canoeing, fishing and lake cruises.

Deadline for the registration is March 31, 1991.

Organizer: Prof. R. Hakkarainen	Summer Semester Address: M.Sc. Salli Lehtinen Faculty of Mathematics and Natural Sciences University of Jyväskylä P.O. Box 35 SF-40021 Jyväskylä, Finland	Telephone: 030-61-682203 Fax: 030-61-682201 E-mail: MNTA@JYV.FI
------------------------------------	--	---

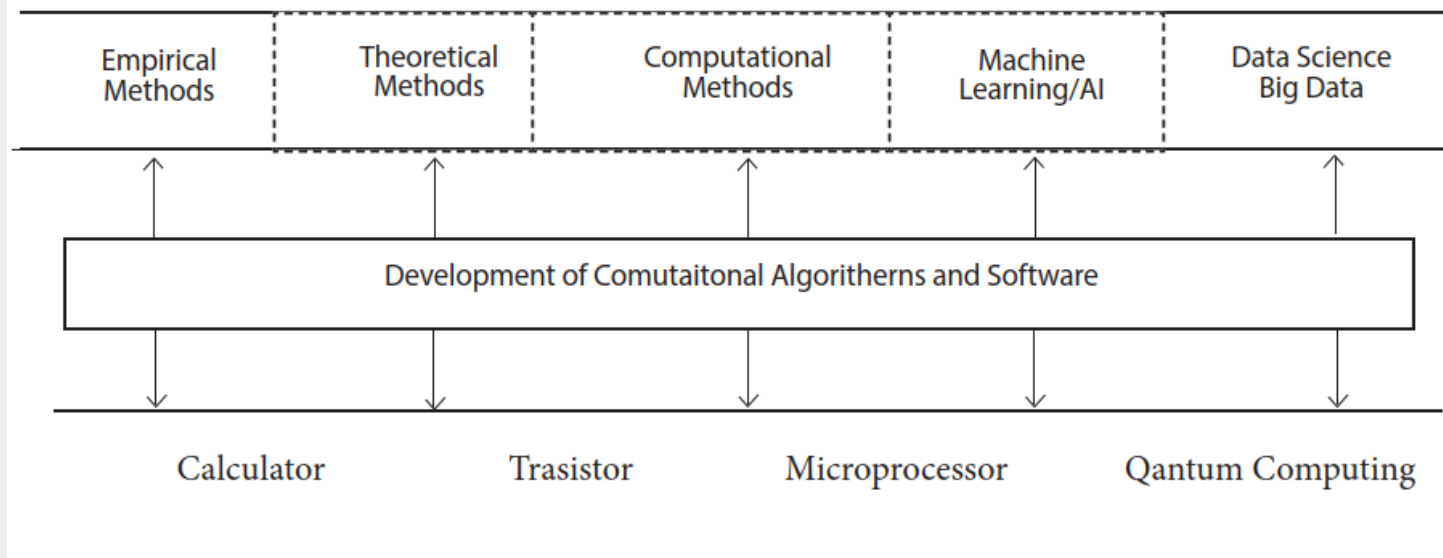

Opportunities Unleashed

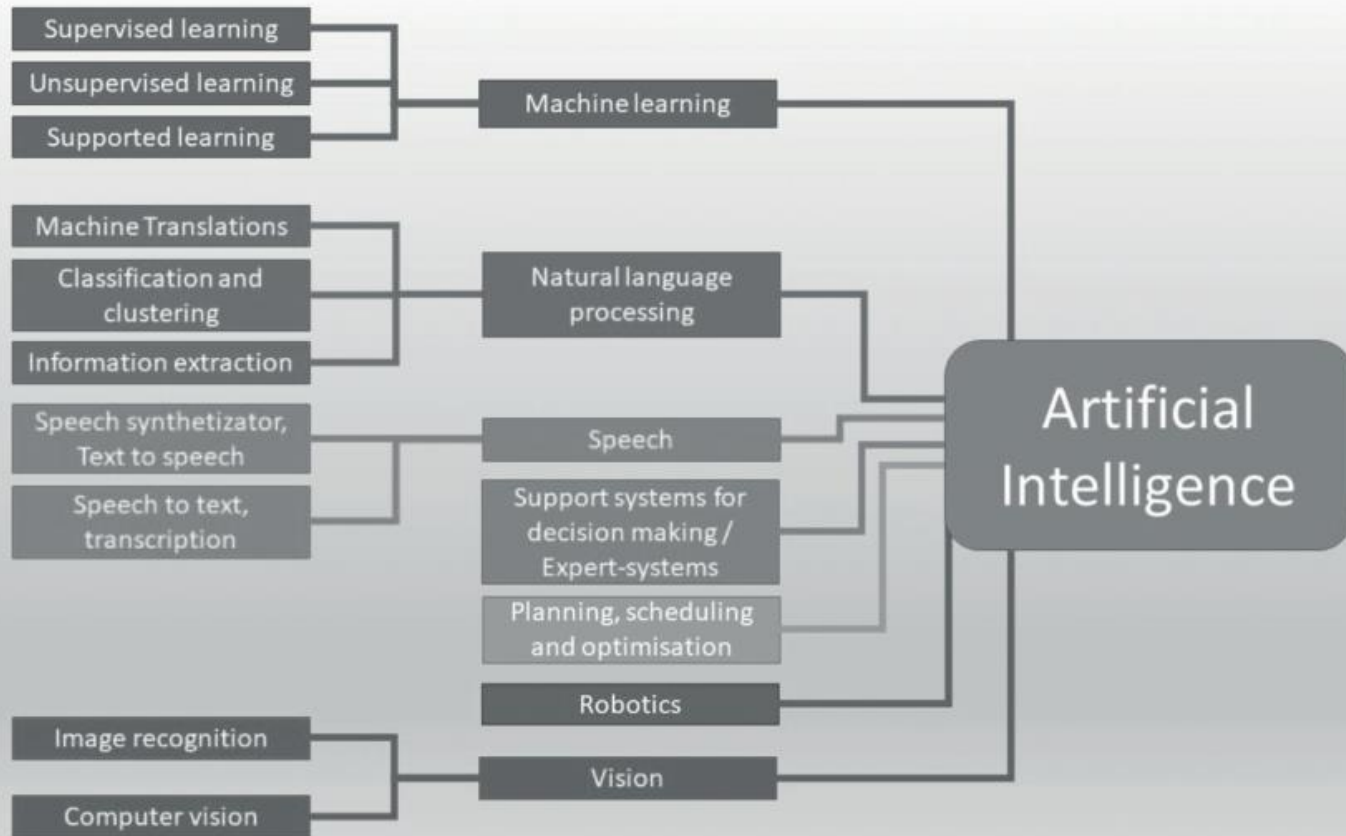

- **Enhanced Educational Outcomes:** Adoption of AI tools to tailor educational content to individual needs, enhancing learning experiences.
- **Virtual and Augmented Reality:** Development of VR and AR environments to simulate real-world scenarios for students in various fields.
- **Innovation and Societal Impact:** Projects like predictive analytics to improve student retention rates, extending educational reach globally.

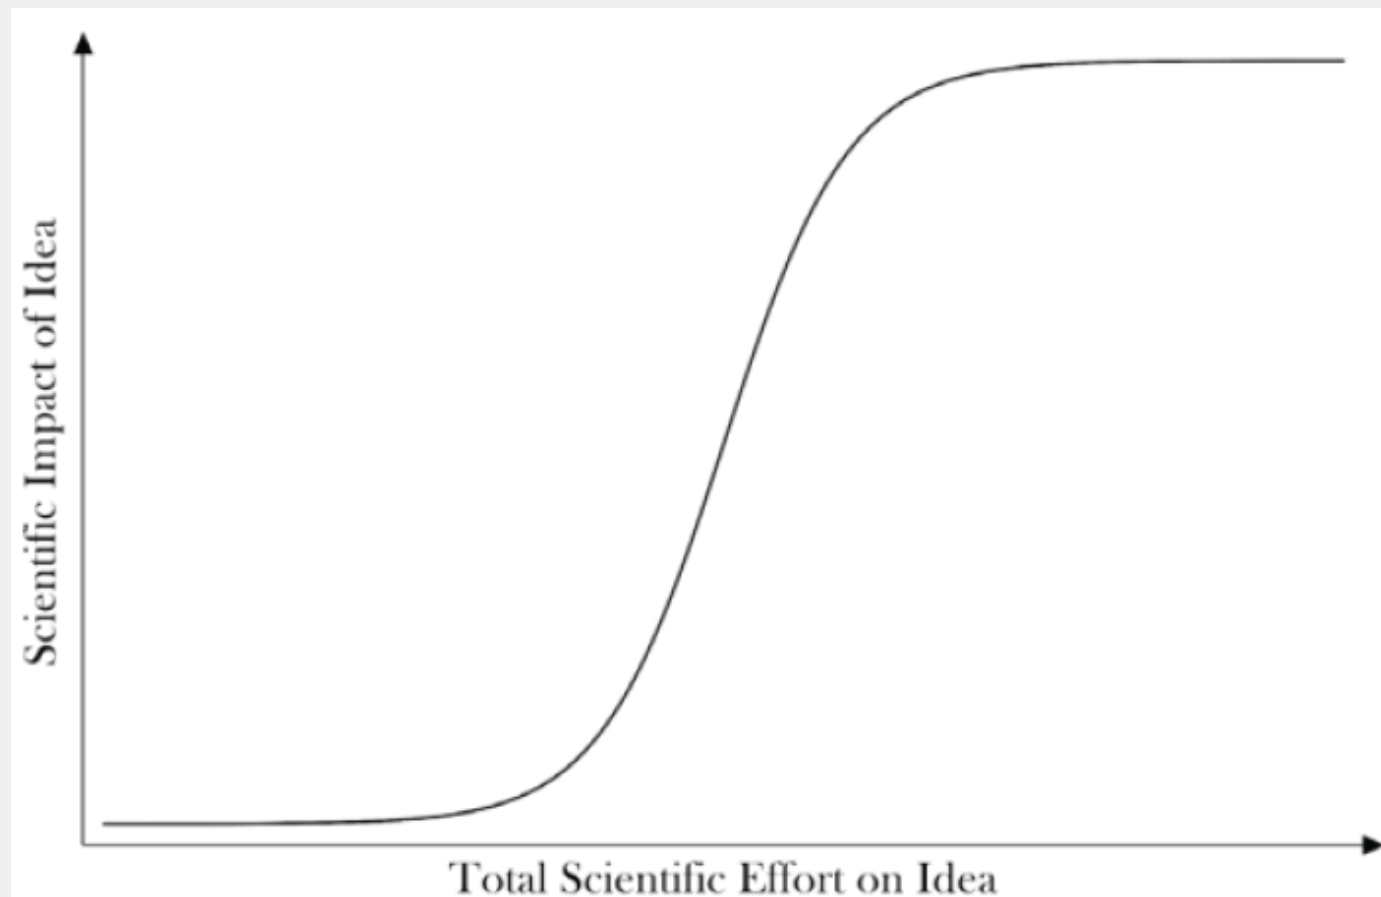

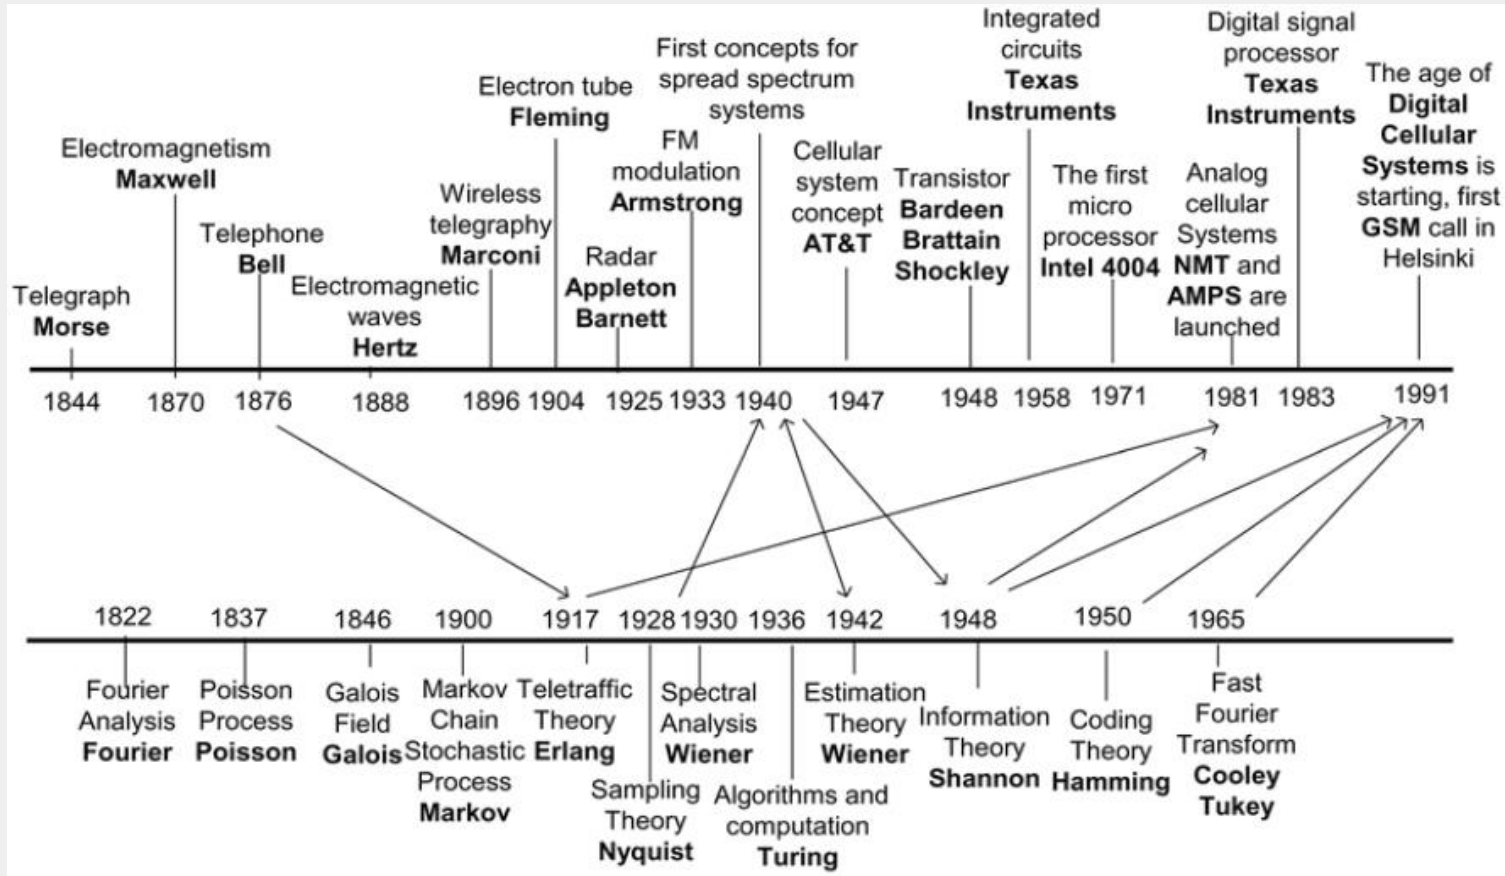

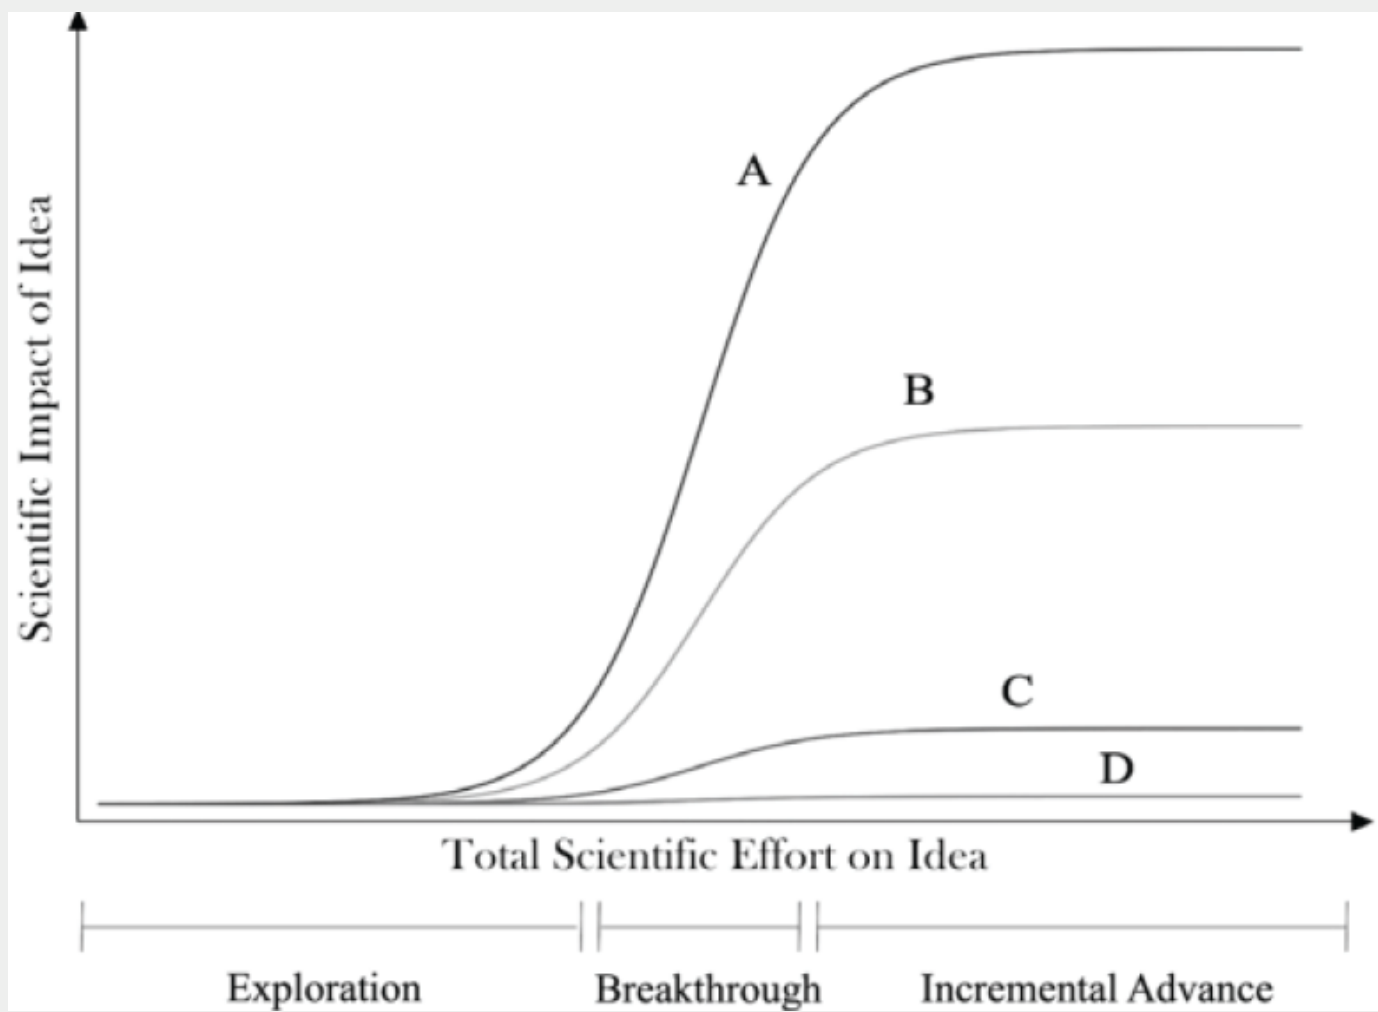

Since ancient
history

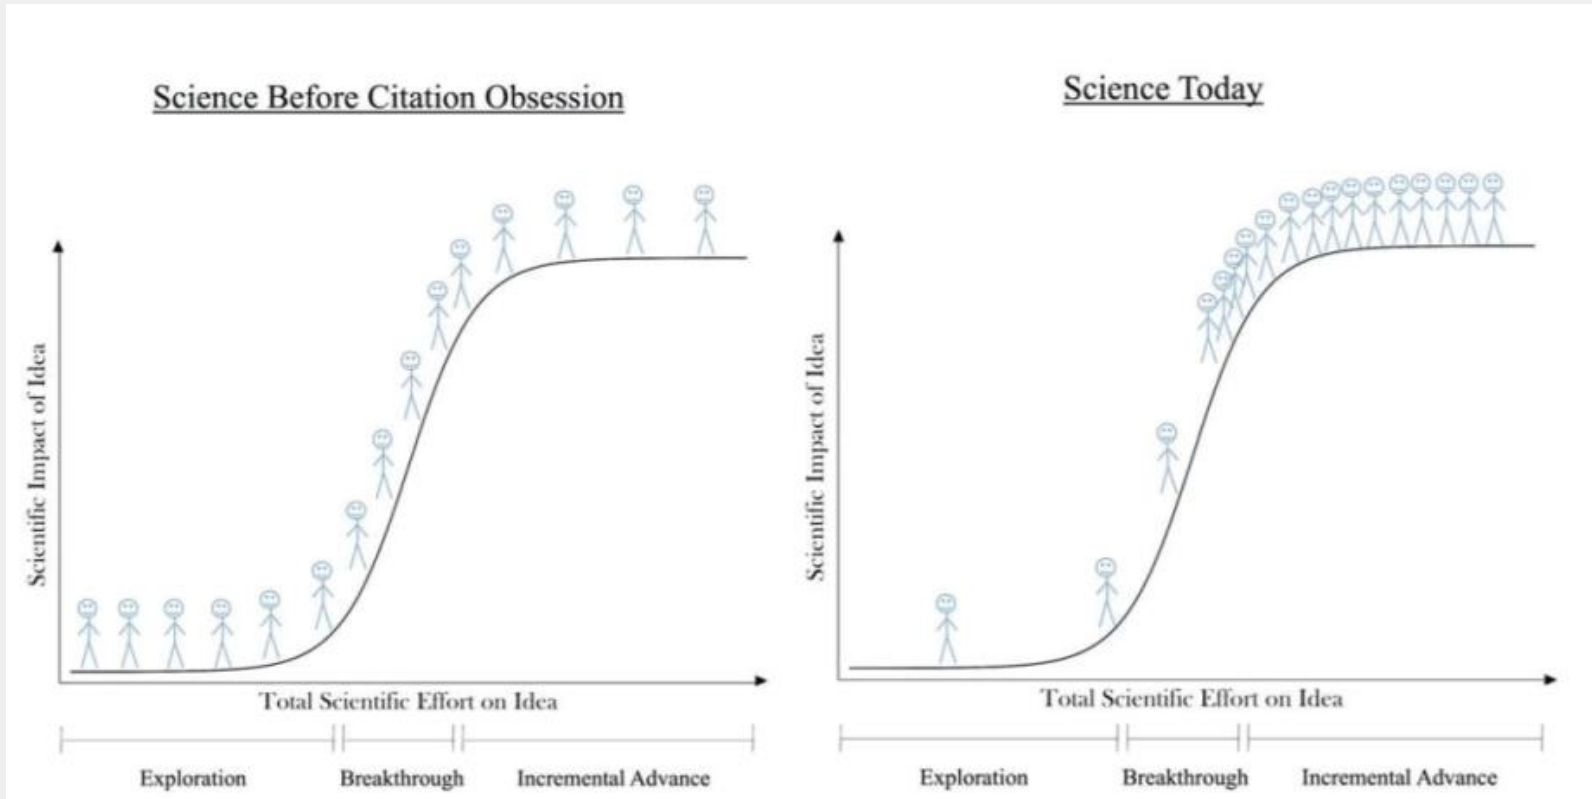

More than 20 Years in International Research Education

More than 20 Years in International Research Education

- 130 successfully doctorated PhD students
- Mentoring the next generation of top scholars, innovators and entrepreneurs
- Sharing good practices

More than 20 Years in International Research Education

- **Global Context:** Overview of 20+ years supervising doctoral students from diverse countries.
- **Double Dissertations:** Introduction to the model of double dissertations, increasingly popular and supported by the EU.
- **Diverse Student Origins:** Students hail from India, Israel, China, Nigeria, Pakistan, Tunisia, Ukraine, and Russia and more.

Classification of Dissertation Types

- **Tailored Objectives:** Dissertation objectives are tailored based on the student's educational background, ranging from scientific to applied research.
- **Supervision Roles:** Inclusion of home university representatives in the supervision process.
- **Educational Backgrounds:** Contrast between theoretical and practical backgrounds of students influencing their research directions.

- **Cooperation Models:** Explanation of cooperation models with international universities focusing on specific scientific or technological areas.
- **Synergy Creation:** Details on the synergy created by combining different expertise areas from multiple groups.

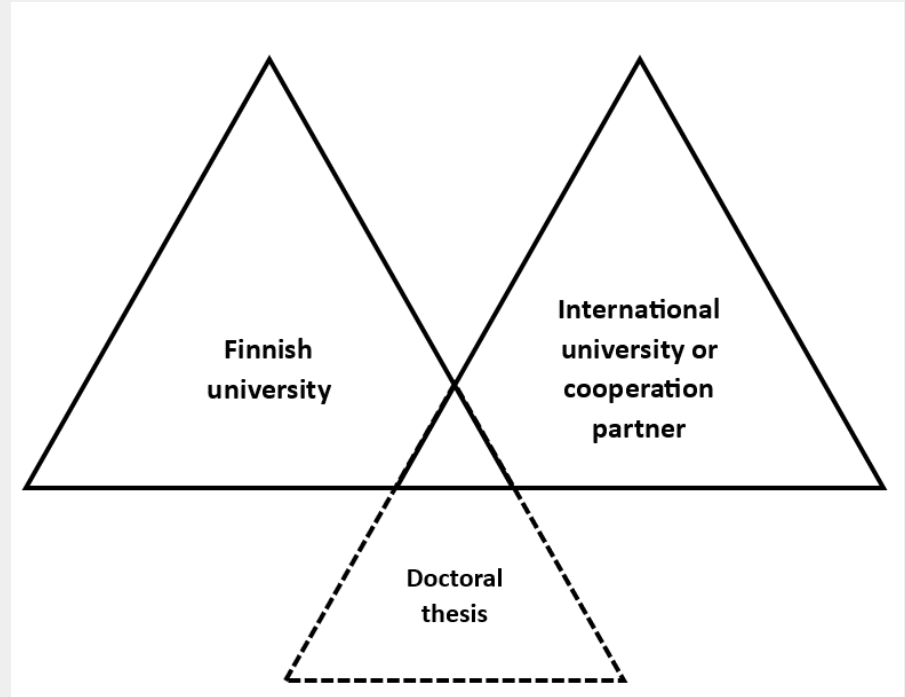

Cooperation model in international doctoral dissertations.

The operating model has been based on the synergy of two or more groups, where different areas of expertise have been combined.

- **Collaborative Supervision:** involving local and international faculties.
- **International Roles:** international professors as part-time docents, researchers, or professors to enrich the educational experience.

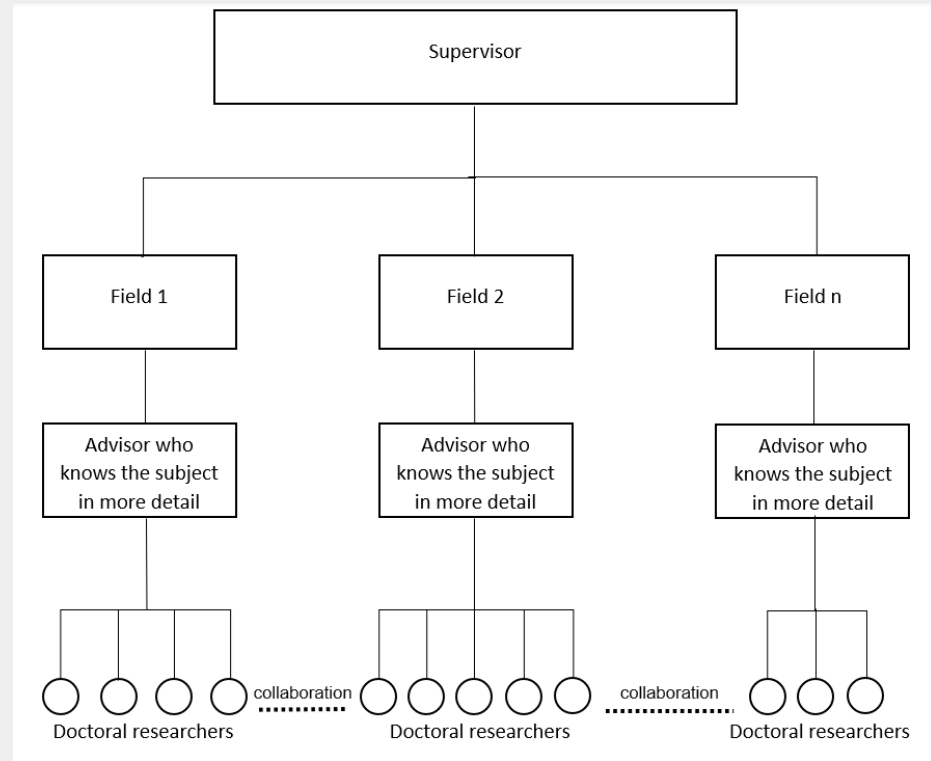

Cooperation model in international doctoral dissertations.

The operating model has been based on the synergy of two or more groups, where different areas of expertise have been combined.

Supervision involves cooperation with the local university and international partners. International professors have been appointed as docents, researchers, or professors. Some of these are, for example, part-time (such as 20%) professors for five years.

Country analysis

- **India:** 3-5 universities; remotely completed master's studies as part of doctoral training; scholarships; high potential.
- **Israel:** Existing network; high level of expertise; technologies.
- **Russia:** Break in cooperation, but high potential.
- **Pakistan:** Existing network.
- **EU countries:** Double degree; EU projects; EU funding; high potential.
- **African countries:** UNESCO network.

UNESCO Chair on Digital Platforms for Transforming Economies

About The Host Institution: Lappeenranta-Lahti University of Technology

- **Academic Excellence:** Ranked among the TOP 300 globally by THE World University Rankings, offering diverse programs in technology, engineering, and more.
- **International Outlook:** Highly international environment with campuses in Lappeenranta and Lahti, promoting global research collaborations.
- **Innovation and Entrepreneurship:** Encourages real-world problem solving and supports numerous startups and innovative projects.
- **Research Focus:** Conducts cutting-edge research in energy technology, circular economy, and more, partnering with global industries.
- **Green Campus:** Recognized for sustainability efforts and commitment to UN's Sustainable Development Goals.
- **Partnerships and Networks:** Maintains strong connections with industrial and governmental bodies to enhance research and education.
- **Student Support:** Extensive support services including career counseling and academic advising for a holistic educational experience.

Contributions to UNESCO Priorities

- **Outcome 1: Future of Inclusive and Equitable Quality Education:** Enhancing access to education through digital platforms, particularly in underserved regions, supporting UNESCO's global educational vision.
- **Outcome 2: Strengthen International Coordination for Achieving SDG4:** Focusing on international coordination and innovative research to implement the global education agenda.
- **Outcome 3: Advanced International Collaboration in Science, Technology, and Innovations:** Strengthening scientific cooperation through digital solutions, advancing sustainable development globally.

Unique Contribution and Added Value

- **Digital Platforms as Economic Multipliers:** Facilitating participation of local and indigenous service providers in digital markets, promoting economic inclusivity.
- **Technological Integration for Enhanced Services:** Integrating AI into shared infrastructures to improve efficiency and affordability of essential services.
- **Strategic Alignment with UNESCO's Goals:** Supporting inclusive social development and fostering intercultural dialogue through lifelong learning opportunities.

Contribution to Sustainable Development Goals (SDGs)

- **Strategic Approach:** Accelerating progress through partnerships and knowledge sharing, leveraging digital technologies to drive sustainable development.

Navigating the Challenges

- **Sustainable Funding Models:** The need for continuous investment in technology upgrades and training, requiring innovative funding solutions.
- **Digital Literacy:** Programs to enhance tech skills of faculty and students, integrating digital literacy across all disciplines.
- **Balancing Technology with the Human Element:** Ensuring technology enhances rather than replaces human interactions in education.

THANK YOU FOR YOUR ATTENTION!
